Comments about your tutorial

1. Tutorials were initially very helpful with written detailed explanations, however, they soon progressed into a simple preview of the tutorial answers as we were shown the tutor's written answers at first, before eventually progressing to simple projections of the actual answers which we had to copy down with little explanation.

2. i prefer the way that tutor work through the process with us, not write down already and show us the solution

3. It's very helpful, thanks

4. I did not feel comfortable asking even the most trivial questions in my tutorial as I felt I would be ridiculed. Whether it be my own fault or that of the environment created by the tutorial itself, it was a high-strung hour to be apart of.
